

UNSIO - Bug #3666

compilation fails on Ubuntu

11/16/2016 06:33 PM - Jean-charles LAMBERT

Status:	New	Start date:	11/16/2016
Priority:	High	Due date:

Target version:			

Description

Compilation fails on Ubuntu, mainly because a problem of library loader.

On ubuntu It's necessary to add HDF5_LIB and SQLITE3 to link against executable whereas it's not on mageia.

On mageia, ldd libunsio.so returns all dependencies, included hdf5 and sqlite3

On ubuntu, ldd libunsio.so does not have dependencies on hdf5 and sqlite3, therefore all link on executables failed to resolve dependencies on hdf5 and sqlite3 because these dependencies are not explicitly written in target_link lines.....
